We invite you to visit Russian collective stand at **INDIAWOOD 2018** on 8-12 March 2018 in Bangalore International Exhibition Centre.

This is the first-ever participation of the Russian woodworking companies in the IndiaWood Show! Russian manufacturers will be represented under the authority of the Russian Export Center, a state institution for export support, set up and powered by the Government of the Russian Federation.

Six Russian exhibitors are world leaders in wood-processing industry, exporters and manufacturers of plywood (including birch plywood), panels, laminated chipboard, fiberboard, sawn timber, intumescent coatings and impregnants, transparent wood paints and varnishes.

Russian timber is famous for its high density and quality. It is exported all over the world and the volumes are instantly growing. We hope Russian exporters will find right and reliable partners in India, thus strengthening relations and developing Indian-Russian cooperation.

You are welcome to visit Russian companies in **Hall 3UL (stand C301)** and **Hall 4 (stand A159-157)** and get acquainted with the Russian products!
