REITERATES ITS POSITION AS ASIA'S LEADING EVENT FOR THE WOODWORKING AND FURNITURE MANUFACTURING INDUSTRY

INDIAWOOD 2022 held between 2 - 6 June, 2022 witnessed a stupendous response from the industry, surpassing previous visitor numbers, gaining favourable reviews from the exhibitors and emerging as the most important congregation point for the entire woodworking and furniture manufacturing Industry.

Mr. Juergen Koepfel, President, EUMABOIS (European Federation of Woodworking Machinery Manufacturers) said, "The Indian furniture sector is growing rapidly and represents one of the main sectors of the country's economy. According to latest statistics, India ranks 6th among the largest furniture manufacturers on global level and it is the 4th largest furniture consumer. Moreover, projections for furniture consumption are expected to show a growth by 5% in 2022 and by 4% in 2023. Considering these facts, it is only natural that more and more foreign companies and investors start up their furniture production in India. Same applies for other wood-based products, too".

INDIAWOOD 2022 spread over 64,000 SqMs hosted over 798 exhibitors from 50 countries and hosted 9 dedicated country pavilions. The event was supported by leading Industry associations and trade bodies, with various knowledge and skilling sessions, thus creating a platform which was all-encompassing and relevant for the industry.

Sonia Prashar, Managing Director, NuernbergMesse India while speaking on the occasion said, "The Woodworking and Furniture Manufacturing Industry is gearing up for fully integrated production and a fully integrated future. The future will be defined by integrated process flows encompassing production planning, product design to manufacturing, distribution and sales. Automation and digitalisation are opening up new business possibilities, customer demands are getting more individualised and moving away from standard products; modernisation and mechanisation is on the rise. At this juncture, platforms like INDIAWOOD are instrumental in complementing the growth of this industry."

INDIA MATTRESSTECH + UPHOLSTERY SUPPLIES EXPO (IME), held concurrently to INDIAWOOD, emerged as the most important sourcing forum for the mattress manufacturing Industry. With over 100 exhibitors, the exhibition had an impressive display of latest machinery and technology.

Wood+ in Architecture and Design, the latest venture of the INDIAWOOD brand took place on the 3rd of June and explored the versatility and durability of wood in the construction Industry. The event hosted leading Architects and domain experts who addressed various facets and nuances of wood in construction Industry. Sessions at the event covered specific design and construction topics related to wood including mass-timber products, codes and compliance, fire resistance, structural design and layout and more.

Visitors from all quarters including furniture manufacturers, kitchen manufacturers, saw millers, board manufacturers, fittings and component manufactures, traders, architects, builders and interior designers were able to explore the latest in technologies, materials and innovations at the event. As a knowledge sharing forum, INDIAWOOD featured multiple seminars on latest trends and innovations organised by leading Industry associations as well as Skill development programs organised by the Furniture & Fittings Skill Council of India.

Sivakumar Venugopal, Member of the Management Board, NuernbergMesse India concluded by saying, "Visitors at INDIAWOOD had an opportunity to meet the suppliers and the Industry at large, after a gap of two years. The power of face-to-face interactions is unsurpassable and we are glad that INDIAWOOD has emerged as a platform which could facilitate this".
